PC(S1)-2

POPULATION OF CONGRESSIONAL DISTRICTS: APRIL 1, 1960

Final population figures from the 1960 Census of Population for the 426 congressional districts in the United States, as defined on April 1, 1960, were released today by the Bureau of the Census, U.S. Department of Commerce. Although the House of Representatives currently has 437 members, 11 are elected at large and do not represent specific congressional districts. Representatives are elected at large in the six States which currently have one Representative (Alaska, Delaware, Hawaii, Nevada, Vermont, and Wyoming). In addition, New Mexico and North Dakota elect both of their Representatives at large and Connecticut elects one of its six Representatives at large.

The 426 congressional districts ranged in population from the Twelfth District of Michigan, which had 177,431 inhabitants, to the Twenty-eighth District of California, which had 1,014,460 inhabitants. Three other Districts--the Second of Arkansas, the Second of South Dakota, and the Fourth of Colorado--had fewer than 200,000 inhabitants. On the other hand, four districts--the Fourth of Florida (982,968), the Fifth of Texas (951,527), the First of New York (906,187), and the Thirteenth of Illinois (905,761)--had between 900,000 and 1,000,000 inhabitants. Two out of every three of the districts, however, had between 250,000 and 450,000 inhabitants.

Four out of every five of the congressional districts as defined on April 1, 1960, gained population over the decade. Four of

the districts--the Twenty-fifth and the Twenty-eighth of California, the Sixth of Florida, and the First of New York--more than doubled in population. Another--the First of Arizona--just missed doubling its population. Losses of more than 20 percent were experienced in three districts--the First of Illinois (27.3 percent), and the First (25.6 percent) and the Thirteenth (22.4 percent) of Michigan. Two districts had gains of more than one-half million. The Twenty-eighth District of California had the largest gain, increasing from 346,844 in 1950 to 1,014,460 in 1960, a gain of 667,616. Another district--the First of New York--experienced a gain of 591,871.

The data shown in this report relate to the congressional districts which were established in accordance with an apportionment based on the results of the 1950 Census. This apportionment allocated 435 Representatives to the 48 States then in existence. Membership in the House of Representatives was increased temporarily to 437 with the admission of Alaska and Hawaii as States. In November 1960, the Bureau of the Census submitted an apportionment based on the final results of the 1960 Census. In accordance with existing law, House membership would revert to 435. As a result of changes in their number of Representatives, many States will revise their districts. The population of the districts established for the elections of November 1962 will be published by the Bureau of the Census at a later date.
